

Joshua

Age: 15

Birth year: 2011

Joshua is a special little boy with lots of love to give. Joshua likes to play with cones, puzzles, monster trucks, and play outside. Joshua is diagnosed with Autism and behavior disorder. Joshua works with therapists to make sure he is getting all of his psychological needs met. Joshua is non verbal and is learning to use an iPad to express his needs. Joshua attends speech, occupational, and physical therapy and needs to continue to make sure he is making progress. Joshua is on an IEP at school for Autism and a developmental disability and receives services through school as well.

A family interested in Joshua will need to have time to dedicate to his basic and special needs. They will need to be willing to advocate to make sure he is getting his educational, psychological, and behavioral needs met. The family should be loving, and patient and need to be committed to working with Joshua as he does not trust or adjust to change very quickly.

If you are interested in adopting Joshua,
please have your Caseworker email your home study to: Bridget Coleman
